PROJECTS

Sorting Algorithm Visualizer GitHub	Nov' 25
- Created an interactive Java Swing tool that visually demonstrates and compares the behavior of six widely used sorting algorithms. - Led the design of a clear, user-friendly interface enabling users to select algorithms and adjust array size. - Integrated adjustable controls for animation speed and data volume, allowing learners to observe and analyze algorithm performance more effectively. Tech Stack: Java , Awt , Swing	
Sustainable Fashion Marketplace GitHub	Apr' 25
- Developed a web-based marketplace promoting ethical fashion by helping users discover and purchase sustainable and eco-friendly clothing options. - Built both the frontend and backend using HTML, CSS, and PHP; organized the product catalog, and structured the cart, checkout, and payment flow with clear layout and navigation. - Delivered a complete multi-page shopping platform—including dedicated sections for men, women, kids, footwear, and payment—allowing users to browse products, add items to the cart, and complete purchases smoothly. Tech Stack: HTML , CSS , JavaScript , Tailwind CSS , PHP	

TRAINING

Summer Training Internship -Lovely Professional University Certificate	Jun' 25 – Jul' 25
- Completed a structured Data Structures & Algorithms training program to enhance problem-solving abilities and strengthen foundational coding skills. - Practiced and solved a wide range of coding challenges across arrays, strings, recursion, dynamic programming, and greedy techniques to improve logic and efficiency. - Maintained strong consistency throughout the training and successfully completed the full DSA curriculum, demonstrating improved analytical thinking and optimized coding approaches.
